

CRIT is the largest private pediatric rehabilitation system in the world

with 198,420 patients treated to date (in Mexico). CRIT USA's mission is to serve children in the United States with neuromusculoskeletal disorders through comprehensive treatment and therapy, which promotes full development and integration into everyday life.

The Children's Rehabilitation Institute of Teleton (CRIT) was founded in 1999.

Pay-what-you-can

Patients at CRIT pay according to their means and receive physical, psychological, social and spiritual support.
